Project Manager: Javier Fernandez Jover
Project Sponsor: Sales Direction NovaSales
Last revision: 22/10/2026
Project objectives: centralize sales pipelines and give visibility

---

NovaSales

What's the company focus?
NovaSales is a B2B commercial team whose focus is the services and commercial technology. Their commercial structure is composed of 5 sales representatives in charge of the whole business process. They are in charge from the client acquisition to the closing.

As-Is
Each of the commercials is in charge of their own clients and opportunities independently. This provokes that most of the information is located in local files and long mail threads which make the following work very hard because there is no central repository for the state of the negotiation of all the clients.

Pain Points

- The direction have no actual point of situation of the pipelines, without this information, they are unable to make income expectatives and forecast
- Since the sales representatives don’t have automatic alerts of their deadlines, it's often that they miss some of them and lose potential clients.
- Due to these facts, they lose potential clients and have critique delays due to a miss-organization

---

Project Objectives

- Create a single source of truth so everyone information the company has relevant to any relevant fields can be consulted here.
- To register all the following steps and deadlines with remember mails to avoid the lost of potential clients
- To give the directors more visibility about the status of each relationship

---

Project Scope

- Define and design a data modelling of the commercial data
- Create a Product Backlog
- Configurate a working prototype with Salesforce

- Define and execute UAT
- Document the implement solution and the project outcomes

Out-of-Scope

- ERP integration
- Massive Data Migration
- Post-production support

Success Criteria

- MVP definition and backlog prioritization
- Successful execution and validation of acceptance test cases in Salesforce.
- Required project and product documentation is completed and delivered.
- Sales Management can access a centralized view of opportunities and pipeline status.

Stakeholders

- Sales Management of NovaSales
- Sales Representative of Nova Sales
- Project Manager of CAMINNA
